

# MASTER OF PUBLIC ADMINISTRATION 2024/2025

FACULTY OF  
BUSINESS AND ECONOMICS

**MASTER OF  
PUBLIC ADMINISTRATION**

## PROGRAMME GOAL AND LEARNING OUTCOMES

### Programme Goal

To introduce a world-class postgraduate programme in public administration which is designed to develop knowledge as well as enhance analytical and critical skills towards cultivating ethical, competent and responsible graduates, particularly those serving as public managers and policy makers.

### Programme Educational Objectives(s)

- (1) Graduates demonstrate knowledgeable and skillful administrator in the field of public administration.
- (2) Graduates are professionally involved in the field of public administration, locally or globally.
- (3) Graduates apply the expertise in the field of public administration through knowledge integration with best practices

### Programme Learning Outcomes

At the end of the programme, graduates are able to:

- (1) Develop in depth knowledge and understanding of issues, challenges, responsibilities and opportunities in a diverse and dynamic context of public administration.
- (2) Apply cognitive knowledge and skills in public administration.
- (3) Apply problem solving skills and decision making techniques in the organization.
- (4) Enhance interpersonal and communication skills in public administration.
- (5) Apply digital and numeracy skills for lifelong learning.
- (6) Integrate theories and practices in leadership management, autonomy and responsibility as an administrator in analyzing administrative and political issues.
- (7) Strengthen personal skills and entrepreneurship in managing issues and problems in public administration.
- (8) Practicing ethical values and professionalism in managing issues and challenges pertaining to public administration.

## STRUCTURE OF PROGRAMME OF STUDY

Code	Course	Credit	Duration of Examination	Distribution of Marks	
				% Continuous Assessments	% Final Examination
<b>CORE COURSES</b>					
AA0X7001	Research Methodology	4	2 hours	100	-
AA027015	Research Project	10	-	100	-
AA027002	Public Administration and Politics	4	2 hours	60	40
AA027003	International Public Management	4	2 hours	60	40
AA027004	Public Policy Analysis	4	2 hours	60	40
AA027005	Fiscal Administration	4	2 hours	60	40

**And at least twelve (12) credits of the following optional courses:**

### OPTIONAL COURSES

AA027006	Public Administrative Behaviour	3	2 hours	60	40
AA027007	Public Personnel Administration	3	2 hours	60	40
AA027008	Global Politics	3	2 hours	60	40
AA027009	Quality Governance in Public Sector	3	2 hours	60	40
AA027010	Malaysian Politics	3	2 hours	60	40
AA027011	Local Government	3	2 hours	60	40
AA027012	Social Policy and Development	3	2 hours	60	40
AA027013	Planning and Community Development	3	2 hours	60	40
AA027014	Political Communication and Media	3	2 hours	60	40
AA017019	Political Economy	3	2 hours	60	40
AA037002	Survey Techniques and Sampling Design	4	2 hours	50	50
AA037013	Statistical Methods for Quality Management	3	2 hours	60	40

\*Optional courses offered in each semester may vary from semester to semester.

**MASTER OF PUBLIC ADMINISTRATION  
TIMETABLE**

**COURSE INFORMATION****AA0X7001**

4 Credits

## Learning Outcomes

**RESEARCH METHODOLOGY**

At the end of the course, students are able to:

- (1) Examine the logic of scientific discovery and the novelty in research.
- (2) Evaluate the usage of inductive and deductive research.
- (3) Compare the different types of research methodologies.
- (4) Formulate a research proposal.

## Synopsis of Course Contents

Using examples from past research and methodologies across 4 disciplines (economics, applied statistics, development studies and politics), this course seeks to examine in its entirety the philosophy and methodology of research so as to help equip students with a better understanding of how to undertake research, analyse data, and write scholarly and policy papers. Following a sequential exposition of the philosophical underpinnings of research and methodology, and the procedures of data collection, estimation and interpretation, the course introduces all the main current methodologies as well as qualitative and quantitative tools of data analysis.

Lectures will be supplemented with a critical examination of the methodological frameworks used in selected leading publications and by leading scholars from inter/disciplinary fields.

In class lessons will be revisited towards the end of the course through a careful selection of case studies from multiple disciplines (tier 1 journal publications from economics, applied statistics, dev studies and politics). This way, students will have a broad introduction to various ways in which data, methodologies, software and methods are combined in academic research. The emphasis will be on methodological debates and diversity within social sciences. Equally, they will receive practical lessons on how to handle discipline-specific big data sets.

Lastly, they will receive hands-on training on complete research proposal developments applying creative and critical thinking using problem sets.

**RESEARCH PROJECT**

**AA0X7001**

At the end of the course, students are able to:

- (1) Determine a suitable topic for actual problems, objective and background of research based on actual issues in organization or industry.
- (2) Analyse information from the relevant literature and design a research framework.
- (3) Determine the appropriate methodology in collecting the required data.
- (4) Integrate the information/ data collected.
- (5) Prepare written research report

The course is designed to train students in conducting research in public administration and writing a research paper. Each student is guided by one supervisor from faculty and can be together from industry experts from the development of a research project to the completion of the research report. The stages include identification of issues, establish problem statement, research questions, research design, literature review (analysis, synthesis and critic of empirical research and theory), data collection, data analysis, analysis of the findings to answer the research questions, and drawing appropriate conclusions.

Continuous Assessment: 100%  
Final Examination: None

**SURVEY TECHNIQUES AND SAMPLING DESIGN**

Learning Outcomes

At the end of this course, students are able to:

- (1) Demonstrate a sound understanding of the research process and research methodology;
- (2) Collect primary data using appropriate data collection and sampling methods;
- (3) Analyze data and draw conclusion; and
- (4) Demonstrate skills in effective writing and communication.

Synopsis of Course Contents

This course covers major issues connected with the research process in various fields. The course is designed to equip students with a sound understanding of theory building and the research process, with emphasis on quantitative applications of research methods. Students will learn the techniques of sampling, data collection and analysis for report writing. The course will also train students on critical analysis of published research and equip them with communication skills

## **STATISTICAL METHODS FOR QUALITY MANAGEMENT**

Learning Outcomes

At the end of this course, students are able to:

- (1) Explain the role of statistical methodology, tools and techniques for quality management in the field of social science.
- (2) Apply the appropriate statistical tools, techniques and software applications in describing quality characteristics.
- (3) Analyse statistical results in solving quality related problems.
- (4) Construct various forms of results to effectively communicate on findings about quality

Synopsis of Course  
Contents

This course exposes students to basic concepts of quality and the roles of statistical methods in understanding and managing quality of processes and products. Statistical software is utilized in understanding the process and product quality characteristics. The topics covered include Statistical Thinking in Quality Improvement, Statistical Process Control, Variable and Attribute Control Chart, Hotelling's T2 Control Chart, Multivariate Methods for Quality Improvement, Acceptance sampling.
